

STEP & WALL DATA SHEET

SPECIES: European Oak (American Oak Available)

FINISH: Bona Matte Finish

THICKNESS: 3/8" without Cork Back
1/2" with Cork Back (IIC Rating 65)

WEARLAYER: Sliced 0.6mm

CORE: Water Resistant HDF Core

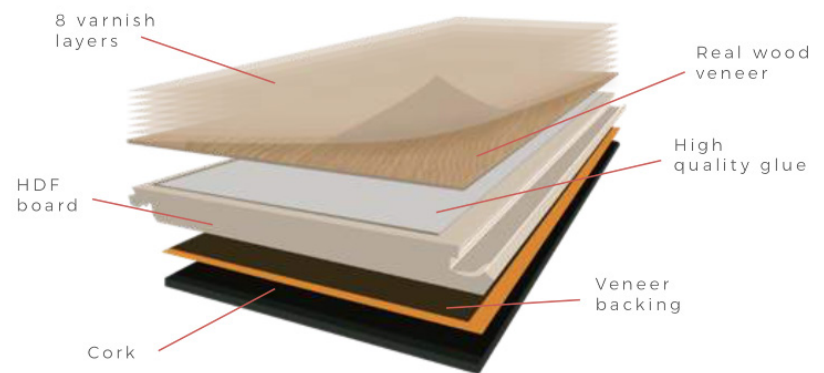

BACKING: Sliced 0.6mm

EDGE: Micro Bevel

STYLE: Click & Lock "Waxed"

HARDNESS: PSI Rating 5,800

WARRANTY: Brushed (15 Year Warranty)
Smooth (15 Year Warranty)
Protected (20 Year Warranty)

Step & Wall is formed, first of all, by a thin layer of natural wood. This veneer has a high quality primer to ensure better adhesion with the 8 coats of varnish. These facilitate the final protection of the floor. The middle layer is HDF, a board that provides excellent strength and durability properties. Finally, a backing of natural wood veneer to ensure stability. This last layer is covered with a sheet of cork of 2 mm to reduce floor to floor sound transmission. This is how we achieve a floor with excellent acoustic performance: foot steps are felt as firm and solid. Cork increases comfort produced by natural wood flooring, and it is a sustainable, ecological material with a very efficient sound absorption and thermal insulation. In addition, it is odorless and resistant to chemical agents and light.
